

LOUDER TODAY

DIGITAL ACCESSIBILITY STATEMENT

Last Updated: April 10, 2026

Our Commitment to Accessibility

At LOUDERtoday, we believe that personal growth should be accessible to everyone. We are committed to accessibility, diversity, and inclusion — and that commitment extends to our digital properties.

We are making ongoing efforts to ensure that LOUDERtoday.com, our mobile applications, and all of our digital content are accessible to all users, regardless of ability or the assistive technology they use.

Our goal is to align with applicable accessibility standards, including the **Web Content Accessibility Guidelines (WCAG) 2.1 Level AA** and, where applicable, the **EN 301 549** standard.

How We Work Toward Accessibility

To meet our accessibility objectives, LOUDERtoday partners with accessibility experts and leverages established technology platforms and best practices. Our approach includes:

- **Ongoing evaluation:** Our digital properties are regularly evaluated against WCAG 2.1 AA and other applicable standards using both automated tools and expert review, including testing with users with disabilities.
- **Inclusive design and development:** We integrate accessibility considerations into our design and development process, including testing for compatibility with common assistive technologies such as screen readers, keyboard navigation, and voice recognition.

- **Continuous improvement:** We are committed to addressing accessibility gaps as they are identified and to continuously improving the accessible experience across our platform.

Third-Party Content

When you navigate from LOUDERtoday's digital properties to a third-party website, platform, or application (such as a payment provider or app store), you are subject to that third party's own accessibility policies and features. While we cannot guarantee that third-party properties comply with WCAG 2.1 AA or other accessibility standards, we encourage all of our vendors and partners to prioritize accessible and inclusive experiences.

Assistive Technology Support

LOUDERtoday strives to support a wide range of assistive technologies, including but not limited to:

- Screen readers (such as NVDA, JAWS, VoiceOver, and TalkBack)
- Keyboard-only navigation
- Voice recognition software
- Switch access and other alternative input devices
- Browser zoom and text scaling

If you experience difficulties accessing any part of the Services using your assistive technology, please let us know.

Contact Us

We want to hear from you. If you have questions about our accessibility efforts, encounter an accessibility barrier, need assistance accessing specific content or features, or have suggestions for improvement, please reach out:

Email: support@loudertoday.com

Website: [LOUDERtoday.com](https://loudertoday.com)

We are committed to responding to accessibility feedback promptly and making reasonable accommodations to ensure all users can access our content.
